NOELLE MCISAAC

HR Director
Agency Within
43-34 32nd Pl,
Long Island City, NY 11101

DEAR NOELLE MCISAAC,

I am responding to your call for *Web & Multimedia Designer*.

At the heart of a successful image or campaign are the details of bringing the ideas to users. Ideas need to be at once simple but also generate curiosity – this is where I come in. I am a designer, creative coder and artist with a recent BFA in Art, Media & Technology, from Parsons Paris, The New School. My focus is communicating and being understood in new and innovative ways. I condense complex concepts into simple and playful forms across a variety of media: from the materiality of print media and installation to the interactivity of web design, app design, video and virtual reality.

As co-organizer of Refrag, an annual festival and symposium in Paris, I worked across many disciplines. Apart from my work in coordinating the lectures, performances and panels, I took the lead in communication design of the event. Not the least of my tasks was designing and coding the 2018 festival website. I produced multiple videos and animated gifs, using original footage, to promote the event on social media. Grappling with a low budget and short time frame, I managed high-level responsibilities to coordinate an engaging and memorable event.

As Program Assistant at Parsons Paris, one of my major responsibilities was to design a slideshow presentation template to be used across all departments – from department chairs to the dean of the university. At the time of my arrival, Parsons Paris communication lacked coherence and fidelity to the current brand identity. I worked in collaboration with faculty, communication managers, administration and the student body to merge their different goals into a unified image of the school. I produced digital design templates that are simple to use on multiple platforms, to be used internally and distributed to the public.

My excitement in applying for this position stems from my desire to learn more about constantly evolving strategies of communication, design and marketing. I thrive in collaborative environments that allow me to work in a team while contributing in meaningful ways and having the opportunity to learn and grow. With this in mind, I am eager to work with your team of digital marketing experts and contribute my multidisciplinary approach your dynamic and evolving agency.

Thank you for your time. I look forward to the opportunity to speak with you about my potential within your team.

Sincerely,

SANIE IRSAY
